

EMT Connector Set Screw Type

Steel - Zinc plated

ELECMAN® Steel EMT Connector Set Screw Type is a type of electrical conduit fitting used to connect Electrical Metallic Tubing (EMT) to junction boxes, enclosures, or another section of conduit.

Material:

Steel

Type:

Set screw type

Surface Finish:

Zinc plated

Thickness of plating:

The average thickness of plating is 12.7um, the minimum thickness of plating is 10.2um.

Certification & Standard

Certification:

Manufactured to Underwriters Laboratory Safety Standards UL 514B
UL File No.: E513114

Packing information:

The packing information of steel EMT connectors set screw type are as indicated in Table 1.

Dimensions:

The dimensions of steel EMT connectors set screw type are as indicated in Table 1.
